Everyone can be successful at playing tennis. It might not look like it but from the moment you step on the court I will have you busy with using and developing tennis skills. From agility, balance and coordination obstacle courses to tennis football, special ball pickups to real tennis instruction and drills. My favorite lessons are those that trick youths and adults to remember the techniques of proper tennis strokes.

Racquet Order Form

A racquets are Wilson brand. They are top quality and considered players racquets. Starting at age 9 and beyond the quality of racquet has an impact on the quality of hit a player can make. This is akin to using wiffle bat and wiffle ball for youngsters in baseball. Then progressing to using aluminum bats and real baseballs as the player gets taller and stronger. Before Age 9 it is not necessary to use these higher quality of racquet and the less expensive type from Target or Walmart work fine.

Wilson 25” approx. age 9-10 or taller younger player, \$99
